You may want to see the growing list of RSGB IOTA potential contestants on the NG3K Announced Operations Web page for this contest: <http://www.ng3k.com/Misc/iota2002.html> The page currently contains information about 131 operations from islands around the world, as announced by their organizers and friends. The page is also available in versions sorted by DXCC entity and IOTA number. To access these, just click on the appropriate heading at the top of the main page table. Those wanting an ASCII version of the list that they can more easily copy/paste for local editing can find it at: <http://www.ng3k.com/Contest/conasc.html> Additional operations may be submitted by using the form found at: <http://www.ng3k.com/Contest/consub.html>. Don't forget to include the island name and IOTA number in the Notes field. Finally, Ric, DL2VFR also maintains a page of announced operations that contestants may want to refer to. The mast he was using wasn't strong enough to hold it and the rotor. He is looking for something that will work better, and that might have to wait until he goes back to Beijing in 4-5 weeks. His work at the present time has kept him from doing as much operating as he would like, but he will be back on more as things settle down. Meanwhile, with great news that Ed's RTTY activity is now good for DXCC (see
